

1. Every time you click the piece, it means you have select the piece. The next step you can do is to move it.
2. Select a position you want the piece to go and click it.
3. See if the piece is moving to the position you just choose.
- a) If the selected position is not valid, nothing will happen. You have to select a valid position again.
- b) If the selected position is valid, the piece will move directly to the position.

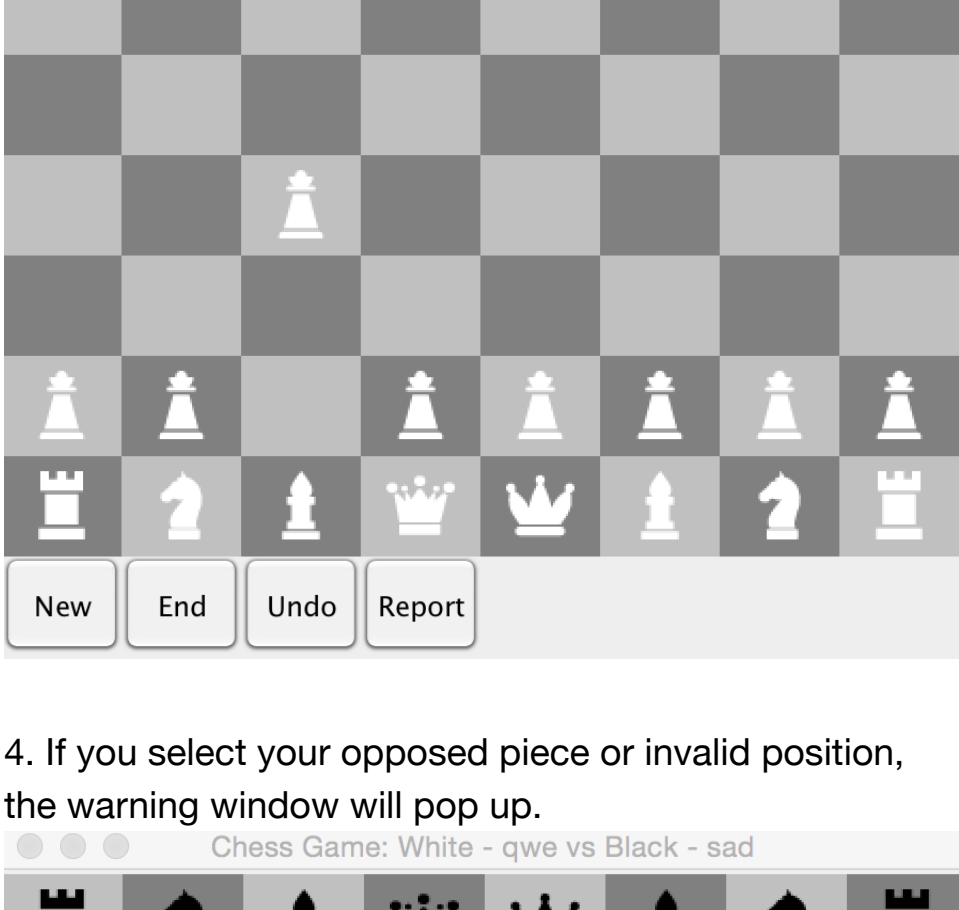

1. First initial the chess board.

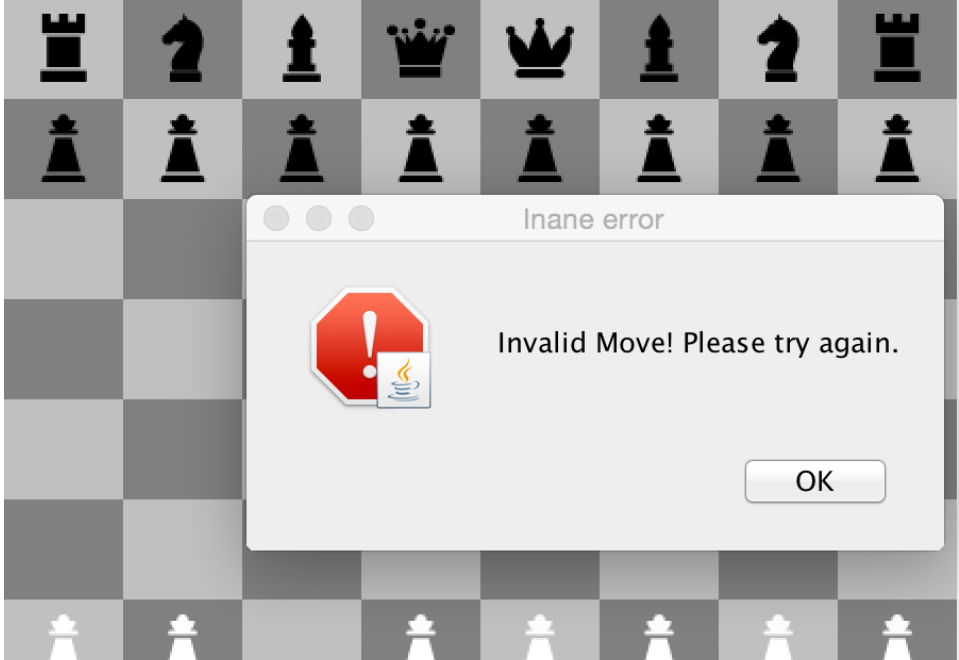

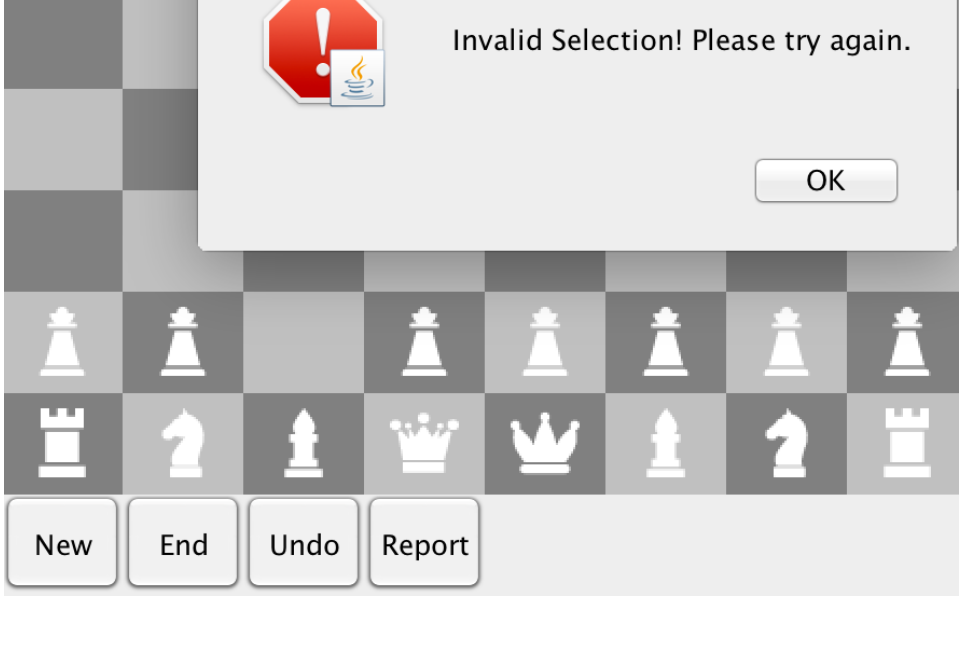

2. Click “New” and the game will start.

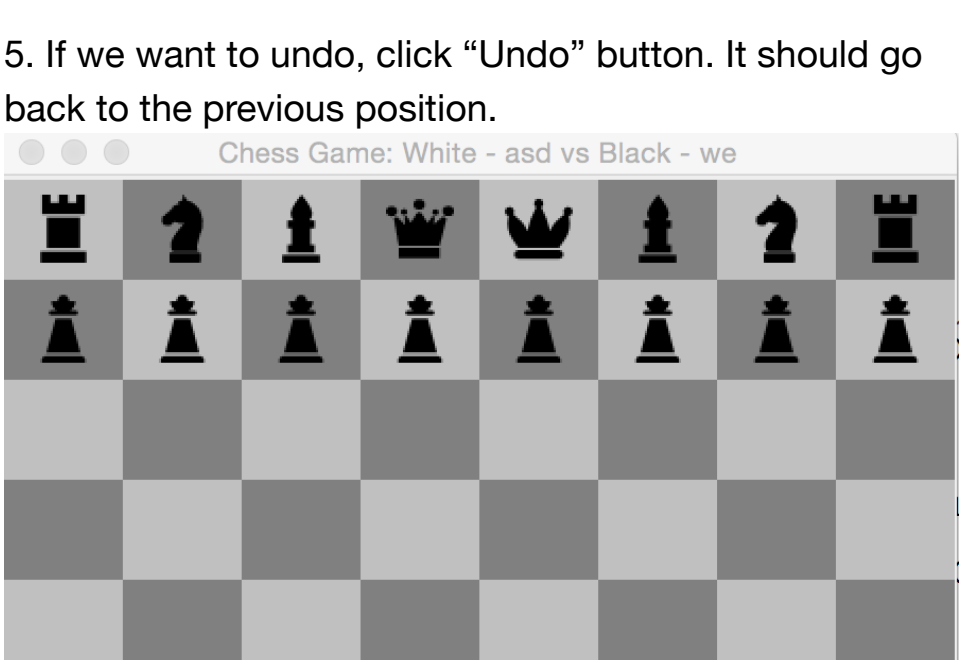

3. Click the your piece and make valid move.

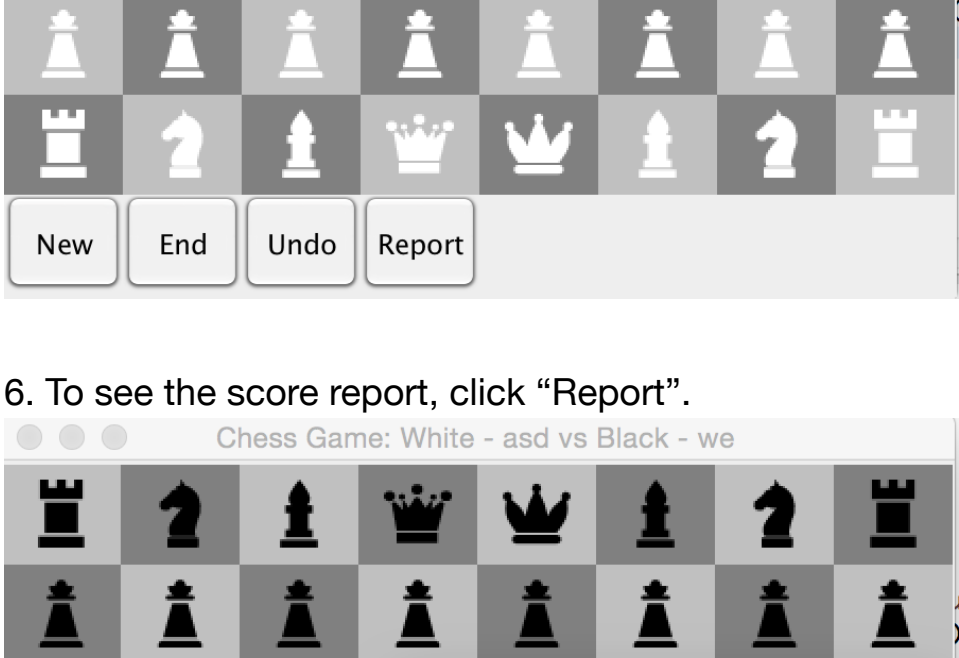

4. If you select your opposed piece or invalid position, the warning window will pop up.

5. If we want to undo, click “Undo” button. It should go back to the previous position.

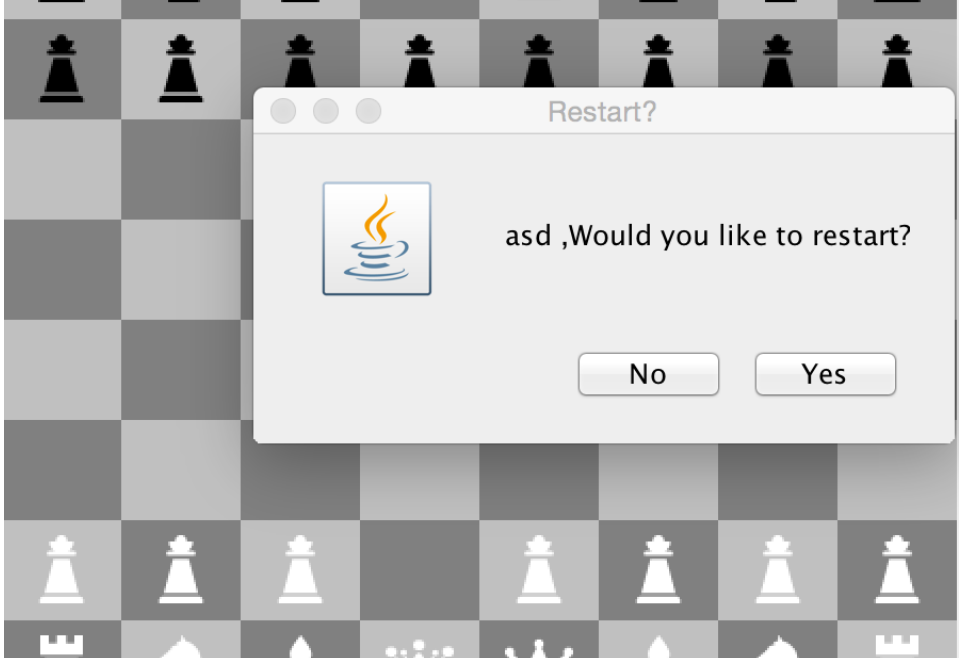

6. To see the score report, click “Report”.

7. To restart the game, click “New”. The window will pop up and ask Black and White players if they want to restart it.

If White Player clicks “Yes”, it will ask Black Player.

If both are yes, the game will restart to initial state.
